Homework submission and test on Vocareum

Language version on Vocareum:
gcc - 5.5
ar - 2.26.1
php - 7.0.32
python2 - 2.7.12
python3 - 3.7.5
Java - 14.0.1
perl - 5.22.1
make - 4.1

(1) After you login Vocareum and choose our course CSCI 561-spring 21, you can find homework 1. We prepare three input.txt/output.txt samples at resource/asnlib/public/sample/. You can create/upload/delete/copy files at the **work** directory.

(2) After **uploading** your homework onto **work** directory (e.g. homework.py), you can point
submit and you will find the feedback on **Submission Report**

(3) For homework 1, we set 1 point for each sample (total 3) and the following feedback
means **pass** the test.

OVERALL RESULT
Test case passed
Great! You get 1 point for this case

Potential errors:

1) If your submission have a wrong filename:

ERROR: Invalid Filename
Please name your program "homework.xxx" where "xxx" is the extension for the
programming language you choose ("py" for python, "cpp" for C++, and "java" for Java).
If you are using C++11, then the name of your file should be "homework11.cpp" and if
you are using python3 then the name of your file should be "homework3.py".
Command exited with non-zero status 1

2) If your submission can not generate output.txt:

ERROR: No output found
Test case xx NO pass

3) If your output is not correct (e.g. not optimal)

OVERALL RESULT
Test case failed
Sorry, You get 0 point for this case

Final results:

1) If you pass all 3 cases:

Mission Completed!
You get 3 point in 3 cases

2) If you pass 1 cases and fail 2 cases:

Mission Completed!
You get 1 point in 3 cases
